

To the FCC; Please let me purchase radio programming that is provided from XM radio. This is information I have elected to pay for and should not be regulated by NAB's petition 04-160. XM Radio provides me with listening pleasure in areas of the country that do not have radio coverage. If I were not paying for the service it would be another issue but since I choose to subscribe to the service it should not be controlled by the National Association of Broadcasters. Please give the NAB's petition 04-160 serious consideration as to how it infringes on my rights of free choice.

Thank You for considering my position.

Sincerely,

Jack T. Pickering
